ŁUKASZ GUZICZAK — AI ENGINEER

In the lab since 2016. In production since 2024. Not since ChatGPT.
Currently embedded at a bank — on-prem, regulated.

They say AI loses the thread past 1,000 lines of code.

Cute.

That's where I start — 20,000 lines.
One file.
One person.

A month to a working PoC. Three to production. No team.

Their teams maintain it.
I'm on the next.

The code says the rest.

SKILLS

GENAI · LLM

RAG · Vector DBs | LLM Agents | Local LLMs · vLLM/Ollama | Claude · GPT · Gemini | Structured Outputs · Evals | Fine-tuning (LoRA)

MACHINE LEARNING

PyTorch · TensorFlow | Computer Vision (ViT)

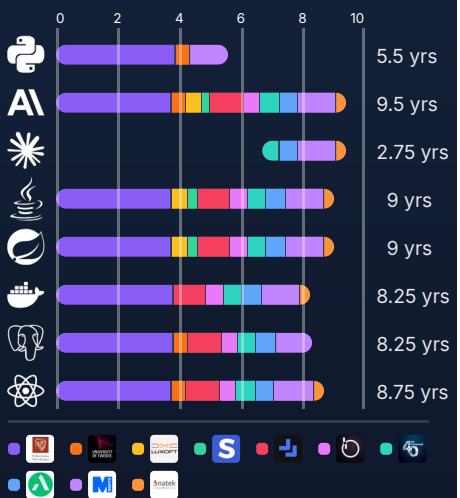

ENGINEERING

Python | Java 17/21 | Spring Boot | FastAPI | SQL (PostgreSQL)

CLOUD · INFRA

AWS · Azure | Docker · Kubernetes | CI/CD

EXPERIENCE

ŁUKASZ GUZICZAK

AI Engineer

SUMMARY

AI Engineer who ships LLM systems to production. Sole engineer of an on-prem document-AI platform — local vision + language models on company GPUs — and creator of OpisAI, a commercial AI clinical-documentation assistant built solo and sold. ML from the foundations since 2016 — Electronics, Stanford's ML (2020); shipping it since 2024. 5+ years of production engineering (Python, Java/Spring, cloud) across healthcare, space systems and fintech; MSc in AI & Machine Learning — thesis on medical-imaging transformers.

NOW

2026 → OpisAI — Own AI Product (built & sold)

Founder & sole engineer · AI scribe for vet clinics

Sold commercially, in daily clinical use · Claude / GPT / Gemini

2025 → AI Engineer — Document AI Platform

Natek · embedded at a bank

In production, maintained by the bank's team · local LLMs + vision · EU AI Act

WORK EXPERIENCE

AI/ML Research Engineer — IoT — 2025

Astek · Software House

Project: BikeBox – smart secure bicycle storage system (R&D)

- Developed IoT backend with real-time sensor data processing and monitoring pipelines.
- Trained predictive occupancy model enabling real-time booking decisions based on station demand forecasting.
- Designed microservices architecture for scalable smart infrastructure data collection.

AI Solutions — Healthcare Analytics — 2024 – 2025

Kamsoft · SaaS

Project: AI-powered analytical decision support system for healthcare

- Built analytical automation features with data-driven decision support for medical diagnostics.
- Engineered optimized data processing pipelines for large-scale healthcare datasets.

ML & Data Engineer — Space Systems — 2024

Thorium Space Technology · Satellite Communications

Project: Resource management for satellite communications platforms

- Designed intelligent resource allocation systems for satellite communication platforms.
- Built real-time telemetry processing modules for satellite bandwidth allocation optimization.

WORK EXPERIENCE (CONT.)

AI-Assisted Data Engineer — 2023 – 2024
Right Information · Software House

Project: ERP system for payments, accounting and payroll

- Migrated legacy system to modern architecture; pioneered AI-assisted development with ChatGPT.
- Implemented automated data processing workflows with intelligent notification systems.

> *"I highly recommend Łukasz as a valuable, hardworking software developer..."*
> **– Filip Lorek, Founder & CEO**

Data Engineer — 2022 – 2023
Streamsoft · SaaS

Project: ERP software and financial technology solutions

- Developed data-intensive ERP solutions processing large-scale financial datasets with Java.

> *"He is an exceptionally hard worker who works well with others..."*
> **– Zbigniew Wesołowski, Java Developer**

Software & Data Engineer — 2022
Luxoft · Software House

Project: ERP systems and financial applications

- Built enterprise data systems with Java/Spring/Liquibase for high-volume financial transaction processing.

Research Engineer — Data Science — 2021 – 2022
University of Twente, Netherlands · International

- Developed data processing and scientific visualization applications for research projects.
- Designed Python backend for automated analytical workflows and data pipelines.

EDUCATION

MSc Informatics: AI & Machine Learning — 2024 - 2026
WSB Merito University in Wrocław

*Thesis: **Multi-label ECG pathology classification with ViT + DINO***

MEng & BEng in Electronics — 2016 - 2021
Wrocław University of Science and Technology

Master's thesis written in English
