ŁUKASZ GUZICZAK — AI ENGINEER

In the lab since 2016. In production since 2024. Not since ChatGPT.
Currently embedded at a bank — on-prem, regulated.

They say AI loses the thread past 1,000 lines of code.

Cute.

That's where I start — 20,000 lines.
One file.
One person.

A month to a working PoC. Three to production. No team.

Their teams maintain it.
I'm on the next.

The code says the rest.

GitHub ↗ LinkedIn ↗

I build AI systems from experiment to deployment, combining machine learning, software engineering and electronics. My work spans local document processing in banking, commercial veterinary documentation and ECG signal classification. I take responsibility for both the models and the applications that use them.

01 SELECTED WORK

NATEK · BANKING · ON-PREM

IN PRODUCTION

On-prem Document AI

Sole engineer of a platform extracting structured data from scanned financial statements: from design through implementation to deployment. Local vision and language models run on the bank's GPUs; documents stay within the network. Maintenance has been handed over to the bank's team.

Python · PyTorch · Computer Vision (ViT) · Local LLMs (vLLM) · Structured Outputs

OWN PRODUCT · BUILT AND SOLD

OpisAI

An AI scribe for veterinary clinics: from the conversation in the room to clinical documentation. Designed, built and deployed independently, sold commercially and used in everyday clinical practice.

Claude · GPT · Gemini · Structured Outputs · Python

guziczak.github.io/opisai ↗

OWN PROJECT · 17 SPECIALTIES

Wizyta

An AI scribe for human medicine. Offline transcription with doctor/patient diarization, visit documentation, ICD-10 diagnoses, ICD-9 procedures and NFZ point-scoring. Data stays on the computer.

Whisper · Diarization · RAG (OpenVINO) · LLMs · Python

guziczak.github.io/wizyta ↗

RESEARCH · MASTER'S THESIS

ECG signal classification

Multilabel classification of 12-lead ECG signals: a 1D Vision Transformer, DINO pretraining, learned queries and Set Transformer aggregation.

Five fine-tuning runs on PTB-XL; per-class metrics, patient-level bootstrap and sensitivity analysis for shorter recordings. Documented limitations of the method and data pipeline.

Łukasz Guziczak

AI ENGINEER

WORK EXPERIENCE

2025 – present
Natek
AI Engineer — Document AI

Document AI platform at a bank. Local vision and language models, on-prem deployment and maintenance handover to the bank's team.

2025
Astek
Full-stack Engineer AI/ML — IoT

BikeBox: IoT backend, sensor data processing and an occupancy forecasting model for a bicycle storage system.

2024 – 2025
Kamsoft
Full-stack Developer — AI in healthcare

Diagnostic decision support, Spring Boot APIs, React/TypeScript and processing of large medical datasets.

2024
Thorium Space Technology
Full-stack Developer — space systems

Resource allocation and real-time modules for satellite communications platforms; Spring Boot and React.

2023 – 2024
Right Information
Full-stack Developer — ERP, AI-assisted

ERP migration, payments, accounting and payroll. Java/Spring, React and AI-assisted development.

2022 – 2023
Streamsoft
Java Developer — ERP and fintech

ERP solutions and processing of large financial datasets in Java.

2022
Luxoft
Java/Spring Developer — financial systems

Enterprise data and financial transaction systems: Java, Spring, Hibernate and Liquibase.

2021 – 2022
University of Twente
Research Engineer — Python + React

Scientific data analysis and visualization applications. Python backend, automated data workflows and React.

CAPABILITIES

Applied ML
PyTorch · TensorFlow · Transformers · DINO · Self-supervised learning

Signals & Evaluation
ECG · Multilabel classification · PTB-XL · Patient-level bootstrap

Production AI
Local LLMs · vLLM/Ollama · RAG · Structured Outputs · Evals · LoRA

Engineering
Python · FastAPI · Java 17/21 · Spring Boot · PostgreSQL

Frontend & Infrastructure
React · TypeScript · Angular · Docker · Kubernetes · AWS · Azure · CI/CD

EDUCATION

2024 – 2026
Master of Science
Informatics · AI & Machine Learning
WSB Merito University in Wrocław

2016 – 2021
Master of Engineering
Electronics · MEng & BEng
Wrocław University of Science and Technology

LANGUAGES

English (technical)	C2
Polish	native
German	B1

CERTIFICATIONS

Machine Learning ↗
Stanford University

Data Foundations ↗
Google
